

A fare deal for agents

Affordable, flexible, innovative, robust

Of all the sectors in the travel industry, none is under more competitive threat than the travel agent with online providers competing aggressively for each and every customer. Now GQAgent gives you the tools to level the playing field and compete with confidence. Our booking engine and fare management system uses the very latest technologies to deliver real business benefits.

GQAgent Features and highlights

- Fully integrated and fully bookable engine for flights, hotels, car hires and insurance (not a white label solution)
- Displays live availability and price information
- Tailor made to the specifications of individual Travel Agents and Travel Consolidators
- Manages Retail Relationships
- Integrates published and agent fares seamlessly at the point of booking/sale
- Sells dedicated fares to specific markets or city pairs
- Accurately checks complex fare rules such as minimum stay/maximum stay, mixed classes, add-ons, valid/invalid flights, code shares, stopovers at the point of booking/sale
- Connects seamlessly with Sabre, Worldspan, Amadeus, Galileo and Abacus
- Comes with an integrated dynamic fare management facility and customer relationship management (CRM) facility
- Processes all types of prices – fixed or percentage based commissions, currency denominations and fluctuations, and defines contract distribution carriers, connections and sell-ups
- Easy low risk setup
